Maximum Flexibility

• Bring your existing equipment
• Expert installation and support included
• Access to On-Demand Technology services
• Easily adapt to changing business needs

HOSTING SERVICES

Secure • Flexible • Cost-Effective

Modernize your infrastructure without the need for traditional office overhead. As remote work becomes the norm, MelrosePMC offers a superior alternative to maintaining costly office space for your technology infrastructure.

Our Los Angeles-based data center provides enterprise-grade hosting with the flexibility to scale on your terms. With our private infrastructure, your media assets are protected by enterprise-grade security, including biometric access controls, AES-256 encryption, and compliance with SOC 1, SOC 2, and ISO 22301 standards.
